

**Biotin ethylenediamine \*CAS  
1217450-40-2\***Catalog number: 3003  
Unit size: 10 mg**Product Details**

Storage Conditions	Freeze (<-15 °C)
Expiration Date	12 months upon receiving

**Chemical Properties**

Appearance	Solid
Molecular Weight	400.42
Soluble In	DMSO
Chemical Structure	

**Applications**

Biotin ethylenediamine is widely used to label biomolecules that contain either carboxy, phosphonyl or carbonyl group. For example, It is used for biotinylation of nucleosides that have an aldehyde group.
